

# User Console 5.5.33

## Release Notes

August 2020

**About this document** .....1

**Change Requests**.....1

**Legal Information**.....2

---

**Note** • Please note that these Release Notes are not cumulative. If you are upgrading from a release other than the most recent release, you should also consult the release notes that accompany the intermediate releases.

### About this document

The **Flexera User Console 5.5.33 Release Notes** provide an overview of new updates that are included with the User Console. The **Flexera User Console 5.5.33 Release Notes** details the changes in the Change Requests that follow:

### Change Requests

The following change requests have been addressed in the User Console 5.5.33 release.

ID	Description
33215	Improved performance for the Load Analyze step In Normalize process. Large data volume jobs should see faster Analyze ETL performance with this improvement.
33625	Resolved an issue with rows being dropped when adding CPU Maximum Socket field to an Analyzer and Interactive report.

**33249** Added support for special German characters in User Console.

---

**33251** Resolved the issue with Security banner page broken for User Console UI.

---

**32789** Added 9 new interactive reports under Report Management with greatly improved performance. These are pre-built static reports.
